

AMIS Plus Newsletter Nr. 7 – November 2003

Dear Current, Potential AMIS Plus Participants & Sponsors

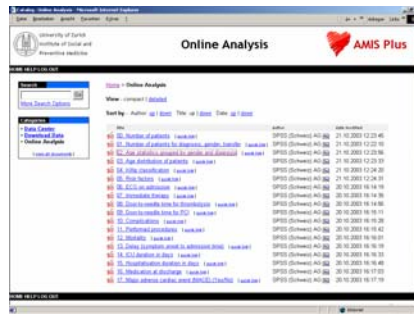

AMIS Plus is stepping into the future !

The first version of our online analysis is in operation since the 20th October. You will find this at the AMIS Plus Website (<http://www.amis-plus.ch>) under Data Analysis.

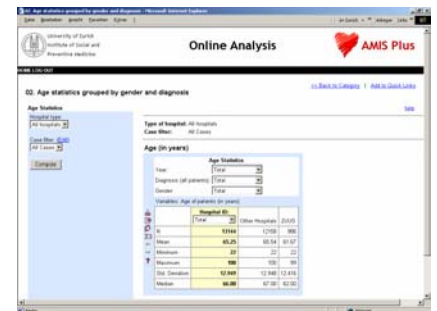

Online Analysis

Now it is possible to compare selected data of your hospital with the entire AMIS Data.

Descriptive statistics of the 18 most-requested and used parameters are given.

The data are depicted in interactive tables and bar charts. The various filters (hospital type, age categories, gender or diagnosis) enable in-depth benchmarking for your hospital.

Download Your Own Data Records

You can also download the entire data of your hospital either into a SPSS or Excel File allowing you to carry out more complex statistical analyses (e.g. variance or regression analyses) and even create presentations.

We, at AMIS Plus, are really excited about this big step into the world of Web-Analyses and are proud to present you with such a large medical online databank. These statistics will help towards optimising the treatment of acute coronary syndrome in Switzerland by showing the areas where improvements can be made.

Please contact us if you have any questions concerning AMIS Plus Online Analysis, if problems should occur or if you have any suggestions.

Sincerely yours

For Steering Committee

For Data Center
